

IMPORTANT UPDATE

Act 585 of 2019 is effective on July 24, 2019, and provides that inflatables, self-contained mobile playgrounds, climbing walls and other patron-propelled amusement rides be inspected annually instead of every 6 months. It also provides that an insurance company inspection is not required for inflatables.

These administrative rules are currently being amended to comply with the new law. To the extent the current rules conflict with Act 585 of 2019, the new act controls and governs.

If you have an inspection covered by Act 585 of 2019 after July 24, 2019, you will not need another inspection for 1 year from the date of that inspection. If you had a covered inspection on or after January 24, 2019, your next inspection is due no later than 1 year from that last inspection. In the event your last covered inspection was prior to January 24, 2019, you were past due for an inspection prior to the effective date of Act 585 of 2019. In such a case, please contact the Amusement Ride Safety Program at (501) 690-8774 immediately to schedule an inspection.
