- Our Vision, The main goal of Hicks Safety Services is to end each day with the assurance that each of our customers has been well taken care of
- Our Company, Hicks Safety Services creates satisfied clients by providing personal service that helps them to make their businesses better and stronger. We provide expert training and consulting experience.
- Our Family, Hicks Safety Services is a family owned and operated business. We take care of our clients personally. We have 5 children: 30, 28, 18, 17, and 14 years old! Four boys and one girl. It is our hope, in the future, that they will carry on and continue to service the clientele that continues to grow each year. We are very blessed! We are dedicated to making sure that each customer is taken care of in a way that is best for them.

Our Services

Site Visits

Site visits include in-depth evaluation of each site for unsafe conditions and violations of safety regulations and policy. You will receive written documentation along with pictures. Also with site visits an evaluation of your training needs will be given and if necessary, a follow-up visit will be scheduled.

Our Services

Incident Investigations

Will include interviews and pictures with recommendations as to how to prevent further incidents from occurring. We will coordinate Drug and alcohol testing (if company policy allows). This is a 24 hour service for your convenience.

Our Services

Record Keeping

All OSHA, MSHA, and company training records will be maintained in accordance with regulations. Injury and illness reports will be generated and displayed as required. DOT compliance packages are available including driver file maintenance.

Our Services

Training Programs

Required programs will be written, implemented and revised as required with employer and employee involvement defined. Employee handbooks are also available customized to your needs.
